

Pomeranian Personality

Tiny Dog, Big Character

Pomeranians pack enormous personality into tiny bodies. These spirited little dogs descend from large sled dogs and retain their ancestors' bold, curious nature despite weighing only 3-7 pounds.

Foxy Features

Pomeranians have distinctive foxy faces with alert expressions and bright, intelligent eyes. Their luxurious double coat forms a frill around the chest and a plumed tail that fans over the back. They come in nearly every color and pattern imaginable.

Temperament

These confident little dogs are lively and playful, enjoying both active play and lap time. They're intelligent and trainable but can be stubborn. Early socialization is important as they can be suspicious of strangers and feisty with other dogs regardless of size difference.

Care Considerations

Pomeranians need regular grooming to maintain their fluffy coats. They're prone to dental problems, so tooth brushing is important. Their small size makes them fragile - they're not ideal for homes with young children who might accidentally injure them.
